

IMPROVED ZONE MANAGEMENT FOR OS2

Boost jukebox earnings by doubling the music coverage in your venues.

TouchTunes' recent OS2 software and Tempo release include sound management to support up to 6 zones on your OS2 jukeboxes!

Benefits of 6-Zone Sound Management

- Greater control of the music that patrons hear inside AND outside your venues
- Ability to customize your sound settings in 6 separate areas of your venue
- Easy set up – add speakers to desired zones and you are ready to rock!
- Software upgrade is available at no cost

Tempo now allows you to assign a name to each zone!

Zone Naming can be helpful when:

- Managing sound settings remotely or in-venue
- Troubleshooting with a venue over the phone

Zone Confusion?

Now that you can double your zone coverage, things might seem a bit confusing. Don't worry! Once you name your zones, they will also appear right on your jukebox manager screen when accessing the Sound Settings, taking the guesswork out of your service calls.

For more details see the Zone Management User Guide in the *Tempo > Help > Resources* section.
